

AbbVie is a highly specialized research-focused biopharmaceutical company. We are committed to resolving the greatest challenges in healthcare, to deliver innovative therapeutic solutions in therapeutic categories such as immunology, hematology, oncology, neurology and ophthalmology.

We are not limited to the treatment of diseases; our ultimate goal is to make a positive contribution to people's lives.

At AbbVie, patients are at the heart of what we do.

We deliver more than medicine and our solutions start with the patient perspective. Patient voices matter and we listen.
